

Call for Extended Abstracts Seventh Triennial Symposium
on Transportation Analysis (TRISTAN VII)
Tromsø, Norway, June 20-25, 2010
<http://www.tristan7.org>
Deadline: October 31, 2009

The Seventh Triennial Symposium on Transportation Analysis (TRISTAN VII) is an international scientific conference that provides a high quality forum for the presentation of mathematical models, methodologies and computational results, and for the exchange of ideas and scientific discussions on advanced applications and technologies in transportation.

The Organizing Committee invites you to submit your extended abstract via the TRISTAN VII homepage <http://www.tristan7.org> by the deadline October 31, 2009. You will find instructions and link to the online submission system on the web pages.

The presenting author must register for inclusion of an accepted presentation in the program. Registration has not yet been opened. Each participant may only give ONE presentation.

Papers that have been selected in the program can be submitted for peer review and possible publication in special issues of three prestigious journals:

- Journal of Choice Modelling
- Transportation Research Part C: Emerging Technologies
- Transportation Science

Plenary speakers:

Martine Labbé, Université Libre de Bruxelles:
Bilevel programming and network pricing

Rolf Möhring, TU Berlin:
Dynamic Routing in Graphs with Applications to Harbour Logistics and Public Transport

M. Grazia Speranza, University of Brescia:
Inventory Routing Problems

You will find more information on the TRISTAN VII web pages.
